# DASH

**Dash is a new conference about building and scaling the next generation of applications, infrastructure, and technical teams**

## Hands-on labs & workshops (3–4 hour sessions)

– Become a Datadog power user
– Onboard new employees using Datadog
– Master devops and containerization from our technical partners

## Talks from cutting edge companies

Learn from high scaling organizations such as Google, Airbnb, DraftKings, Segment, Zendesk, EA Dice, Shopify, Flatiron Health, Datadog, Optimizely, and Intercom

## Workshops

### Datadog 101

– Quickly spot trends and patterns across your infrastructure
– Avoid alert fatigue and monitor what matters

### Hands on with Distributed Tracing & Datadog APM

– Eliminate the challenges of asynchronous tracing
– Identify bottlenecks and why requests are slow

### Kubernetes the AWSome Way!

– Operate a Kubernetes cluster and automate deployments
– Scale and monitor your Kubernetes based apps on AWS

## Featured Speakers

**Tiffany Low**
Tech Lead
Shared Services

Airbnb

**Willie Yao**
Engineering Manager
Observability

Airbnb

*Journey to a Service-Oriented Architecture at 1,000-Engineer-Scale*

**Liz Fong-Jones**
Staff Site Reliability Engineer

Google

**Calvin French-Owen**
CTO
Co-Founder

Segment

*Solving Reliability Fears with Service Level Objectives*

*Fool Me Once: Building a Culture of "Shared Outages"*

## Meet in-depth with Datadog

– Gain access to the Datadog team: leadership, engineers, product managers, and customer success
– Hear new announcements and preview our 2018–2019 roadmap

## Network with the community

– Meet with 1,000+ other technologists who are on the front lines of developing scalable, resilient, high-performance applications, and teams
– Explore the latest offerings from technology and service providers in cloud infrastructure, containerization, and more
