

**YOU SHOULD BE  
COUNTING SHEEP -**  
not counting study issues!

## AN ODE TO SLEEP GONE BY

I used to not sleep, my mind raced all night!  
As a clinical trial operator, my trials weren't running right.

The data was a mess, my team was plagued with delays.  
Our five separate systems worked in too many different ways!

**Then one day I heard the most exciting news:**  
**Medrio + PHARMASEAL natively integrate - you no longer need to choose!**

Now my EDC, CTMS, and eTMF work seamlessly without a peep.  
And they keep my trials running so I can go back to counting sheep.
